... and thereafter is discussed below.

Due Diligence Program Execution on Products Manufactured During 2013

We performed the following due diligence on the 3TG that was necessary to the functionality or production of products manufactured by us or that were contracted to be manufactured for us during 2013. These were not all of the measures that we took in furtherance of our 3TG compliance program or pursuant to the Conflict Minerals Rule and the OECD Guidance. In addition, some of the due diligence measures discussed below are not expressly provided for in the OECD Guidance.

1.   _OECD Guidance Step One:_ "Establish strong company management systems"

    a.   We created an internal team to draft a policy regarding the supply of 3TG for products that we manufacture or contract to manufacture, and to initiate and implement our 3TG compliance strategy (the "Conflict Minerals Working Group"). The following internal functional areas at the corporate level were represented on the Conflict Minerals Working Group: legal; accounting; and internal audit. The Conflict Minerals Working Group also included representatives from each consolidated subsidiary. Such representatives varied by consolidated subsidiary, but generally included personnel from legal, accounting, internal audit, compliance, product management, project management, and merchandising. The Conflict Minerals Working Group, selected members of corporate senior management, as well as selected personnel from senior management, legal, accounting, internal audit, compliance, product management, project management, and merchandising at each consolidated subsidiary, were educated on the Conflict Minerals Rule, the OECD Guidance, our compliance plan and the procedures for reviewing and validating supplier responses to our inquiries. We also retained specialist outside counsel and other consultants to assist us with our compliance efforts.

    b.   We established procedures to maintain business records relating to 3TG due diligence, including records of our due diligence processes, findings and resulting decisions, on a computerized database where practicable, for at least five years.
