In connection with our due diligence, we utilize information made available by the CFSI and the industry organizations and its smelters and refiners. We support the CFSI through our membership in that organization. In the case of gold, we also utilize information made available in connection with the LBMA's Good Delivery List and the RJC's Chain-of-Custody Certification.

(1) “CFSP,” “LBMA” and “RJC” have the meanings provided earlier in this Conflict Minerals Report. CFSP status is as of May 11, 2015 for gold and May 26, 2015 for tin; CFSP active status is as of May 26, 2015; LBMA status is as of May 27, 2015; RJC status is as of May 27, 2015.

We endeavored to determine the mine or location of origin of the 3TG contained in the in-scope products by requesting that the Suppliers provide us with a completed Survey concerning the source of the 3TG in the products sourced from them. In addition, to the extent that a completed response identified a smelter or refiner, we reviewed this information against the list of compliant smelters and refiners and country of origin information made available by the CFSI to its members. If country of origin information for an identified smelter or refiner was not available from this independent third-party source, we reviewed publicly available information, to the extent reasonably available, to try to determine the mine or location of origin of the 3TG.

In addition to some recycled and scrap sources, the countries of origin of the gold and tin processed by the compliant smelters and refiners identified above are believed to have potentially included the following countries. The countries listed below are derived from the country categories used by the CFSI to categorize compliant smelters and refiners.

Angola, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burundi, Canada, Central African Republic, Chile, China, Colombia, Cote D’Ivoire, Czech Republic, Djibouti, DRC, Egypt, Estonia, Ethiopia, France, Germany, Guyana, Hungary, India, Indonesia, Ireland, Israel, Japan, Kazakhstan, Kenya, Laos, Luxembourg, Madagascar, Malaysia, Mongolia, Mozambique, Myanmar, Namibia, Netherlands, Nigeria, Peru, Portugal, Russia, Rwanda, Sierra Leone,

Singapore, Slovakia, South Africa, South Korea, South Sudan, Spain, Suriname, Switzerland, Taiwan, Tanzania, Uganda, United Kingdom, United States, Vietnam, Zambia and Zimbabwe.

Further Risk Mitigation Efforts

We intend to take the following additional steps on in-scope products for 2015 to mitigate the risk that the 3TG contained in and necessary to the products we manufacture or contract to manufacture finance or benefit armed groups in the DRC Region:

1. Encourage Suppliers that provided company level information for 2014 to provide product level information for 2015 through ongoing outreach with these Suppliers.
2. Engage with Suppliers that provided incomplete responses or that did not provide responses for 2014 to help ensure that they provide requested information for 2015.
3. Monitor and encourage the continuing development and progress of traceability measures of Suppliers that indicated for 2014 that the source of 3TG was unknown or undeterminable.
4. Communicate to new potentially in-scope suppliers our expectations with respect to 3TG, including through the dissemination of the Conflict Minerals Policy to them. In addition, as new in-scope suppliers are added, work with these suppliers to ensure that they understand the requirement—~~asurkeosurke~~

All of the foregoing steps are in addition to the steps that we took with respect to in-scope products for 2014, which we intend to continue to take with respect to in-scope products for 2015 to the extent applicable.
